

Specials Made Standard

Cut cast iron better than any other drill in the industry.

CannonPoint is a premium drilling line by Breckers Cutting Tools specifically for cutting cast iron. Here are the features and benefits:

- Proper transfer & reduction of heat
- Unique evacuation of granular-like cast iron chips
- Optimum tool life
- Reduction of exit burrs
- Protection of carbide substrate against wear

CannonPoint

Get the benefits of a special tool at the availability of a standard.

What's in a name?

The first major use for cast iron in the western world was for making cannons and shot, which powered the inimitable English navy.

CannonPoint
